Client / Baulderstone

Location / Bundaberg and Kingaroy

Value / \$21 million

Services / Architecture and Structural and Civil Engineering

“Baulderstone engaged McVeigh as designers and engineers for a number of schools we had been awarded as part of the Federal Government’s BER programme. McVeigh were selected after an extensive process of prequalification involving assessment of technical capacity and value for the State Government.

The schools were located in some of the least accessible areas of the Wide Bay Burnett region north of Brisbane. In total, Baulderstone engaged five architectural firms to provide design services for these school projects. In the design stage of the projects, McVeigh have provided exceptional services in terms of quality and coordination of the documentation and have satisfied all the programming targets we established at their engagement to meet relevant school approvals and to allow Baulderstone to proceed to tender for the work. In this regard, McVeigh have proven equal to the best of our selected architectural teams.

Baulderstone would be pleased to work with McVeigh in future project opportunities.”

Tony Gillette - Branch Design Manager - Baulderstone Queensland
